

Measurements in the Addictions for Triage and Evaluation (MATE) English Version

The MATE is the result of a Dutch research project aimed at developing specifications for domains and functions of measurement instruments for assessing clinical relevant patient characteristics in substance abuse treatment services.

The MATE materials (including manuals, forms, and [E] forms) are provided by [bureau bêta](#) in pdf format free of charge on this site for anyone who wants to use it for nonprofit purposes. It is prohibited to produce, modify and or distribute MATE materials without permission of the authors.

ASI-5th update MATE 2.2
